

Frequently asked Questions...

# HYLOMAR ADVANCED FORMULATION (AF)

## 01 What is Hylomar AF?

Hylomar AF is a solvent free non-hardening gasket sealant.

## 02 What makes Hylomar AF different from other sealants?

Hylomar AF is highly resistant to oils and fuels while remaining as a non-hardening, high viscosity paste. It is also solvent free and can be used in high production environments.

## 03 What is Non-Hardening?

Non-hardening means that no reaction will take place once the product has been applied. The product remains as a high viscosity paste.

## 04 Can Hylomar AF be used without a gasket?

Yes. Hylomar AF can be used without a gasket. Care must be taken to make sure if a gasket is being replaced that it did not have a shimming effect on the application.

## 05 Can I use Hylomar AF on rubber gaskets/o-rings?

Hylomar AF is excellent for use on rubber o-rings and gaskets.
